EDUCATION

University of Maryland, College Park B.S. in Computer Science | *Expected May 2027*

EXPERIENCE

Frontend AI Intern - *Sotirion*

June 2025 - August 2025

- Independently developed a dashboard prototype from the ground up using Svelte and shadcn/ui.
- Integrated frontend components with a Python FastAPI backend through REST APIs and JSON data exchange.
- Contributed to MongoDB database seeding and integrated Google OAuth authentication with the existing backend.

Senior Event Manager - *University of Maryland Memorial Chapel*

April 2024 - September 2026

- Coordinated 100+ events, including weddings, funerals, and university ceremonies hosting up to 600+ guests.
- Independently screened applicants, interviewed and evaluated candidates, and communicated hiring decisions.
- Led employee training while managing event operations, client relations, contracts, scheduling, and financial transactions.

Computer Science Intern - *Exelon*

June 2023 - August 2023

- Conducted software performance testing using SoapUI to evaluate application behavior and identify defects.
- Deployed software packages through Azure DevOps pipelines and verified successful delivery across environments.
- Automated bug-fix notification workflows and spreadsheet-based processes for Technology Architecture and Accounting teams, improving cross-team coordination and reducing manual work.

PROJECTS

Very Small Pet Shop | Full-Stack Web Application | Live Demo

React, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy

- Engineered a full-stack pet adoption platform using React, TypeScript, FastAPI, SQLAlchemy, and PostgreSQL, with a fully custom-designed UI, animations, and original artwork.
- Developed a personality-based matching algorithm using historical data, weighted compatibility metrics, percentile calculations, and dealbreaker constraints to evaluate applicant-pet compatibility.
- Designed and implemented an interactive personality assessment and results interface to visualize applicant profiles, personality distributions, and compatibility scores.

Socioeconomic Data Visualization | Interactive Data Visualization

JavaScript, D3.js, HTML, CSS

- Developed an interactive data visualization application using multiple CSV datasets from public sources, including the World Bank, to explore socioeconomic indicators across countries.
- Implemented metric-based data filtering and transformations to support different analytical views and visualization types.
- Built multiple visualization endpoints featuring bar charts, scatterplots, radar charts, parallel coordinates, and trellis visualizations.

Fruit Shooter | 3D Browser Game | Live Demo on JSFiddle

JavaScript, WebGL 2.0, GLSL

- Developed an interactive 3D browser game using WebGL 2.0 and custom GLSL shaders.
- Generated 3D objects programmatically using procedural geometry and implemented dynamic lighting.
- Implemented camera controls, aiming mechanics, projectile behavior, hit detection, and collision handling.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C++, OCaml
Frontend: React, Svelte, HTML, CSS, Tailwind CSS, shadcn/ui, D3.js
Backend & Databases: FastAPI, Node.js, Express, PostgreSQL, MongoDB, SQLAlchemy, REST APIs
Tools & Libraries: Git, Azure DevOps, SoapUI, Vite, NumPy, WebGL 2.0, GLSL
